

HOW LOW CAN YOU GO?

HIGHEST PERFORMANCE IN LOW COAL

For coal seams with an average height under 1.8 m (70 in), plows are the system of choice for longwall mining.

Automated HBT plow systems allow access to extended reserves in very low coal seams with a height of down to 0.6 m (24 in) — achieving high reserve recovery rates.

BORN UNDERGROUND

HBT RHH800

Base-plate Plow

Installed Power

2 x 400 kW (2 x 540 hp)

Cutting Height

0.6 – 1.6 m (23.6 – 63 in)

HBT GH800B

Gliding Plow

Installed Power

2 x 400 kW (2 x 540 hp)

Cutting Height

0.75 – 2.0 m (29.5 – 79 in)

HBT GH800

Gliding Plow

Installed Power

2 x 400 kW (2 x 540 hp)

Cutting Height

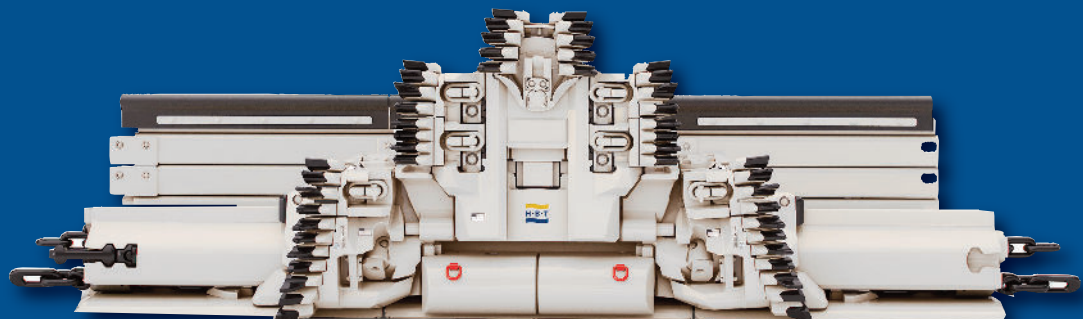

1.0 – 2.0 m (39 – 79 in)

HBT GH1600

Gliding Plow

Installed Power

2 x 800 kW (2 x 1,080 hp)

Cutting Height

1.1 – 2.3 m (43 – 90.5 in)
